PROFESSIONAL PROJECTS

Loan Application (Mobile App + Web)

Technology : React Native, React.js, Node.js, Express.js, MongoDB

- Developed the complete full-stack solution for a lending platform: mobile app with Borrower and Lender roles, and website with Admin, Borrower and Lender roles.
- Implemented Aadhaar-based authentication during registration for both borrowers and lenders.
- Borrowers register and request loans; lenders view all registered borrowers with their history, loans and overdue status.
- Built dashboards with graphs and analytics so lenders can decide whether to approve a borrower's loan.

NRI Circle (Android and iOS App)

Technology : React Native, Xcode (iOS deployment)

- Built a cross-platform app for NRI customers abroad to manage care of their parents, family and properties in India.
- Implemented one-time and recurring service purchases such as parent care and property management.
- Designed multi-level roles: NRI, Vendor, Telecaller, and State, District, Taluka and Super Admin.
- Built the workflow: area admin reviews a request and assigns a local vendor; after completion the telecaller reviews the work and sends photos, documents and reports to the customer.
- Added customer feedback and rating after each completed service.
- Used Xcode for iOS builds, TestFlight testing and App Store release; app is live on both Android and iOS.
